EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Damian M. Aquino (Reg. No. 54,964) on April 6, 2007.

The amendments are as follows:

- Cancel claims 22, 63, 73-74 and 79.
- appending contents of cancelled claims 73-74 to independent claim 69, as follows:

claim 69. A network switch comprising:

first port means for communicating on a first half-duplex channel;

second port means for communicating on a second half-duplex channel;

memory means for communicating with the first and second port means,

wherein the first and third frames are the same and the second and fourth frames are the same;

wherein the first port means comprises:

first transmitter means for transmitting data over the first half-duplex channel;

Art Unit: 2616

first controller means for terminating the first transmitter means from transmitting a first frame of the data when a collision is detected during the transmission and for determining a class of service for each frame, then increment;

an attempt counter means to count transmission attempts by the first transmitter means, wherein the first controller means, after terminating the first transmitter means from transmitting;

increments the attempt counter means; and

discards the first frame when the attempt count of transmission attempts by the attempt counter means exceeds a predetermined attempt threshold; and

wherein the first transmitter means transmits a second frame of the data before retransmitting the first frame when the second frame has a higher class of service than the first frame; and

wherein the second port means comprises:

second transmitter means for transmitting data over the second half-duplex channel;

second controller means for terminating the second transmitter means from transmitting a third frame of the data where collision is detected during the transmission and for determining a class of service for each frame;

wherein the second transmitter transmits a fourth frame of the data before retransmitting the third frame when the fourth frame has a higher class of service than the third frame.
